

Environmental Management Policy

At Masterpac, it is our principle to be a sustainable business by paying serious attention to safety, health and especially environmental concerns, using efficient and environmentally friendly production process and services. In addition to this, Masterpac also collaborates with the government and private sector to develop a greener and cleaner environment. To achieve this, we aim to:

- Strictly comply with all environmental laws and related regulations.
- Separate dangerous waste generated as part of manufacturing process and manage this waste by preventing, controlling, storage and minimizing its impact on society and the environment.
- Effectively monitor and control the usage of electricity and water resources.
- Continuously develop and improve company environmental management system, heading to completed preventive system.
- Control the working incidents as per company objective and target.
- Distribute environmental management policy to all employees and publish to the public.

We are confident that our consumers will also benefit from our efforts to provide environmentally friendly and high quality products and services. Masterpac is proud to be a sustainable business and it is our policy to create a safe and clean environment for our employees, shareholders and the public.
